

Bay Mills Clean Energy Initiative

Empowering our future with sustainable solutions

The Bay Mills Indian Community (BMIC) has been awarded \$17 million by the EPA to support a transformative clean energy project.

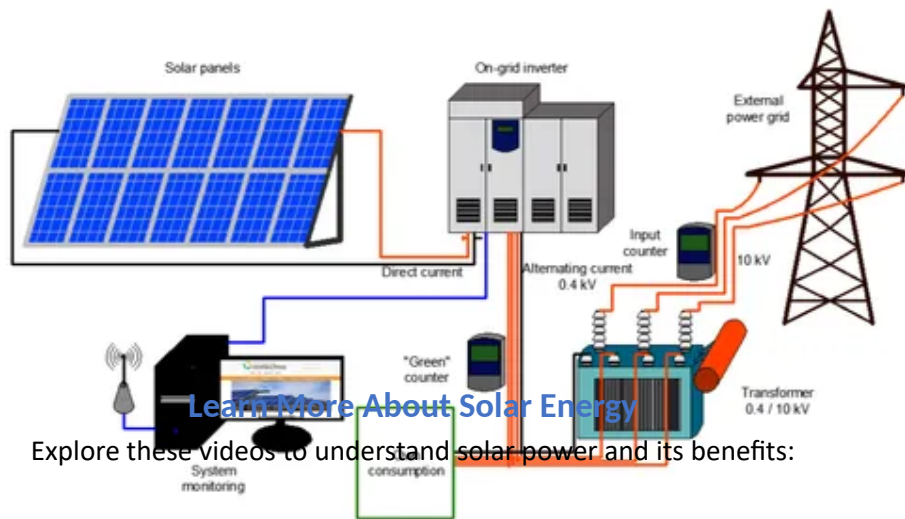

This grant will fund the construction of an:

- 11 MegaWatt (MW) ground-mounted solar facility located on 40 acres of BMIC trust land (near Hwy 221 & 28, south of Brimley)
- 5 MWh Battery Energy Storage System (BESS) to supply power during peak demand

Community Development

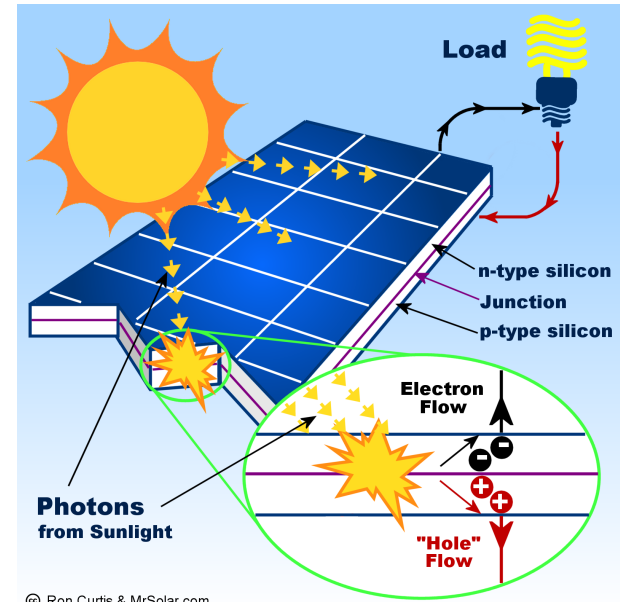

BMIC will also launch a Workforce Development Plan to train tribal service technicians to maintain and support this solar infrastructure and create marketable jobs for BMIC citizens in a rising industry.
